PERMIT NUMBER: ACT/015/019

DATE OF INSPECTION: 5/13/99

(Comments are Numbered to Correspond with Topics Listed Above)

GENERAL COMMENTS

A partial inspection of the reclaimed Cottonwood refuse pile (waste rock) was completed on 5/13/99. The inspection concentrated on two items: (1) Phase I Bond release application by PacifiCorp, and (2) a partial inspection attended by Dennis Oakley, PacifiCorp; Henry Austin, OSM; Pam Grubaugh-Littig, Wayne Western, Bob Davidson, and the undersigned, DOGM.

3. TOPSOIL

Topsoil is currently stored at north active waste rock sites.

4A. HYDROLOGIC BALANCE: DIVERSIONS

The undisturbed diversion is out of the current permit area and Texaco is responsible for the maintenance under written agreements between Texaco, PacifiCorp, BLM, and DOGM.

The majority of the disturbed diversions is sheet flow on the reclaimed site and a berm exists on the perimeter.

4C. HYDROLOGIC BALANCE: OTHER SEDIMENT CONTROL MEASURES

The mine's silt fences treat disturbed runoff. These are located on the east and west side of the reclaimed area.

12. BACKFILLING AND GRADING

Wayne Western completed a report with findings on the regrading of the reclaimed sites. His report found the grading met the coal rule performance standards.

21. BONDING AND INSURANCE

The Division personnel, responding to bond release application, have made favorable findings both with respect to grading and topsoiling. On the site reclaimed in 1983, the operator stated they will pursue Phase II bond release. The other site does not meet the 10 year requirement.

Consensus, Phase I bond release should be approved as submitted by PacifiCorp.

Note: This inspection report does not constitute an affidavit of compliance with the regulatory program of the Division of Oil, Gas, and Mining.
